The 5 most important **RULES FOR BIKING** *in Copenhagen*

476 USING COPENHAGEN'S BIKE LANES

In 2015, Copenhagen officially became the most bicycle-friendly city in the world. The two most important rules for using the city's extensive network of bike lanes are (1) always stay to the right unless you are passing someone, and (2) don't do anything so suddenly that it would disrupt the flow of other cyclists and/or cause a crash.

477 USE THOSE HAND SIGNALS

To turn right, extend your right arm outward before turning, to let cyclists behind you know what you're about to do. If you're going to turn left, do the same thing and remember to look back over your left shoulder first so you don't cut someone off. If you plan to stop, then raise your left hand up for a few seconds before you stop to alert those cyclists behind you.

478 WHAT THE BELL?

All bikes in Copenhagen are required to have a small bell attached to the handle bars. This is the polite Danish way of alerting cyclists ahead that you'd like to pass them. Just lightly ring your bell, the cyclists ahead will move over to the right and allow you to pass. Once you've made your move, then move over to the right yourself and carry on enjoying the freedom of the biking life.

479 PARKING AND LOCKING

When you borrow, rent, or buy a bicycle in Copenhagen, make sure you learn how to lock it securely – and always lock your bike in the city, even if you're popping into a shop for two minutes. Also, look out for 'no bike parking' signs in front of some shops and make sure to pay attention when you leave your bike in a massive bike parking area, many bikes look alike.

480 LIGHTS ON

It's the law in Copenhagen that all bikes have a functioning white front light and a red back light. It is not uncommon to be stopped by the police and to have your bike checked for the proper safety lights. When cycling at night or in low light, always turn your lights on. In case you need to buy bike lights, they are inexpensive and are available in almost all grocery stores, discount shops, and kiosks.
